

Calcium Gel

plus Vitamins

A nutritional supplement for dairy cattle

This preparation supplies these elements to ensure normal nutritional levels before, during and after calving.

Guaranteed Analysis per 300 ml (minimum unless stated otherwise)

Calcium (Ca), min	13.5%	48.6 gm
Calcium (Ca), max	15.0%	54 gm
Vitamin A	568,000 IU/lb	1250 IU/gm
Vitamin D ₃	120,000 IU/lb	265 IU/gm

Ingredients: Water, Calcium Chloride, Tricalcium Phosphate, Xanthan Gum, Vitamin A Acetate, Vitamin D₃ Supplement, Vitamin B₁₂ Supplement, and Riboflavin Supplement.

Directions

Give one tube within 6 to 12 hours prior to calving. Give another tube within 6 to 12 hours after calving.

Directions For Use

Place the tube in a dosing gun and remove the cap. Hold the head of the cow in a normal to slightly elevated position and carefully place the nozzle into the back of the mouth. Slowly give the entire contents of one tube (300 ml) per feeding, allowing the cow time to swallow. Do not give to cows that are unable to swallow.

NET CONTENTS: 300 ml (10.13 fl oz)

Caution: Follow label directions. Contact with eyes or wounds or prolonged contact with skin can cause irritation.

For Animal Use Only
Keep out of reach of children
Single Feeding Unit
Store in a cool, dry place
Discard unused portion
