

ADMINISTRATION AND DOSAGE: Intramuscular or subcutaneous administration only. If dose is greater than 5 mL, equally divide the dose and inject at two different sites. May be repeated.

SUGGESTED DOSAGE: mL

CATTLE (Dairy and Beef)	
Cows and Heifers	
2-3 wks pre-partum	8-10
At calving	8-10
End of lactation	8-10
Calves	
At birth	4-6
At weaning	4-6
Yearlings	5-6

CAUTION: Anaphylactoid or allergic reactions, which have resulted in deaths, have been reported in individual animals as well as entire herds. Should such reactions or hypersensitivity occur, treat immediately with injection of epinephrine and/or antihistamines. Do not exceed recommended dosage. Administration of this product to well-nourished animals may cause hypervitaminosis D, which may result in hypercalcemia and hyperphosphatemia.

WARNING: Do not add water to solution. Not for human use. Keep out of reach of children. **Store between 15° and 30°C (59°-86°F) in a dark place.**

VITAMIN E-AD-300

INJECTABLE TOCOPHEROL

WITH A+D

(Vitamin A, D₃ and E)

FOR ANIMAL USE ONLY
KEEP OUT OF REACH
OF CHILDREN

INTRAMUSCULAR OR
SUBCUTANEOUS
INJECTION ONLY

Net Contents: 250 mL (8 fl. oz.)

Each mL contains: Active Ingredients: 300 I.U. of vitamin E (as d-alpha-tocopherol, a natural source of vitamin E); 100,000 I.U. Vitamin A Propionate; 10,000 I.U. vitamin D₃; **Inactive Ingredients:** 2% benzyl alcohol (preservative) in a water emulsifiable base.

INDICATIONS: Vitamin E-AD 300 is a clear, sterile, non-aqueous solution of vitamin A, vitamin D₃, and vitamin E. The product is intended as a supplemental source of vitamins A, D, and E.

Natural vitamin A (carotenes), and tocopherols can be destroyed in feedstuffs through processing, ensiling and storage. Due to these losses, reduced intakes of fat-soluble vitamins can occur in animals maintained in continual confinement compared to animals allowed to graze lush pasture. Intramuscular or subcutaneous injections offer an efficient and rapid method to increase vitamin A, vitamin D and vitamin E status of animals.
