**USE DIRECTIONS:** Give amprolium at the 0.012% level (10 oz AMPROL 128 20% Soluble Powder per 128 Gallons) as soon as coccidiosis is diagnosed and continue for three to five days. (In severe outbreaks, give amprolium at the 0.024% level.) Continue with 0.006% amprolium medicated water for an additional 1 to 2 weeks. No other source of drinking water should be available to the birds during this time.

Use as the sole source of amprolium.

**CAUTION:** If no improvement is noted within 3 days, have the diagnosis confirmed and follow the instructions of your veterinarian or poultry pathologist. Losses may result from intercurrent disease or other conditions affecting drug intake which can contribute to the virulence of coccidiosis under field conditions.
