

# Decoquate and Monensin

## Type C Complete Medicated Cattle Feed

### INDICATIONS

For the prevention of coccidiosis caused by *Eimeria bovis* and *E. zuernii*, and improved feed efficiency in cattle being fed in confinement for slaughter.

### ACTIVE DRUG INGREDIENTS<sup>1</sup>

|                                  |                                 |
|----------------------------------|---------------------------------|
| Decoquate <sup>a</sup> .....     | 12.9 to 90.8 g/ton <sup>2</sup> |
| Monensin, USP <sup>b</sup> ..... | 5 to 30 g/ton <sup>2</sup>      |

<sup>4</sup>Shall be guaranteed only when total sodium exceeds that furnished by the maximum salt guarantee.

### INGREDIENTS

Each ingredient must be named in accordance with the names and definitions adopted by the Association of American Feed Control Officials.

### FEEDING DIRECTIONS

Feed only to cattle being fed in confinement for slaughter. Feed continuously as the sole ration to provide 22.7 of mg decoquate per 100 lb of body weight per day and 50 to 360 mg of monensin per head per day. Feed for at least 28 days during periods of exposure to coccidiosis or when it is likely to be a hazard. The following table provides examples of feeding rates and amount of drug per ton of feed:

| Animal Wt.<br>(lbs.) | Feed Intake<br>(% Body Wt) | Lbs. Feed Per<br>Head /Day | Decoquinatate<br>(grams/ton) | Monensin, 100 mg/head/day<br>(grams/ton) |
|----------------------|----------------------------|----------------------------|------------------------------|--|
| 500                  | 1.5                        | 7.5                        | 30.3                         | 26.7                                     |
|                      | 2.0                        | 10.0                       | 22.7                         | 20.0                                     |
|                      | 3.0                        | 15.0                       | 15.1                         | 13.3                                     |

|                      | 3.5                        | 28.0                       | 13.0                         | 7.1                                      |

**CAUTION**

Do not allow horses or other equines access to formulations containing monensin. Ingestion of monensin by equines has been fatal. Monensin medicated cattle feed is safe only for use in cattle. Consumption by unapproved species may result in toxic reactions. Feeding undiluted or mixing errors resulting in high concentrations of monensin may be fatal to cattle. Must be thoroughly mixed in feeds before use. Do not feed undiluted. Do not exceed the levels of monensin recommended in the feeding directions, as reduced average daily gains may result.

**WARNINGS**

Do not feed to animals producing milk for food. Do not feed to lactating dairy cattle.

Approved by FDA under ANADA # 200-652
