Product Data Sheet

# Coccidiosis Vaccine

Live Oocysts

## Product Description

The Coccidiosis Vaccine is an orally administered, live coccidiosis vaccine for turkeys. Vaccination is key to proactively and economically addressing coccidiosis. The coccidiosis vaccine contains live oocysts of three *Eimeria* species that are highly pathogenic and predominantly reported in turkeys.

## Overview

The benefits of the Coccidiosis Vaccine are:

- Maximum protection, minimum post-vaccination reaction
- Efficient application system with adaptable spray cabinets

## Usage Guidelines

Follow instructions on box; resulting in 25 mL of vaccine and dye per 100 turkeys.

Possible vaccination programs:

- Annual rotation programs
- Continuous use year round

## Composition

The Coccidiosis Vaccine contains *E. adenoides*, *E. meleagritidis* and *E. gallopavonis*.

## Product Characteristics

Appearance: Clear liquid with white sediment of oocysts  
 Odor: None  
 Packaging: 10 x 10,000 & 10 x 5,000 dose cartons  
 Shelf Life: 12 months when stored as directed

## Storage Instructions

Store at 35-46°F (2-8°C). Do not freeze.

**3-strains:**  
*E. adenoides*,  
*E. meleagritidis* and  
*E. gallopavonis*
